SUGGESTED SPECIFICATION FOR RICKARD MANUALLY ADJUSTABLE CCD, CRD and CSD3 VARIABLE GEOMETRY CAV DIFFUSERS:

Supply and install manually adjustable CCD, CRD and CSD3 Variable Geometry CAV diffusers as manufactured by Rickard Air Diffusion, (Pty) Ltd. Cape Town, Republic of South Africa.

Each CAV diffuser shall be manually adjustable by means of a threaded shaft capable of setting the volume of conditioned air into the space by means of adjusting a variable aperture damper, known as a control disc, vertically within the diffuser. Supply air from the CAV diffuser shall be discharged horizontally in a 360° pattern and will maintain a constant throw throughout the range of volume variation provided the neck total pressure is maintained. The manually adjustable damper shall be adjustable between 0 and 100%.

Diffusers shall be manufactured from Electro Galvanised Steel and Epoxy Powder Coated for chip, rust and scratch resistance.

Terminal heating is an optional extra if required. In such a case, each diffuser shall be fitted with Multi loop Modular controls. Sensing can be onboard or remote sensing as required. All options shall also be factory fitted.

The diffuser shall have a detachable faceplate so that it can hang and be adjusted or be completely removed from the occupied space, giving access to all moving parts from below the ceiling. All diffusers shall carry the manufacturer's 10-year warranty.
